

NmTM Nanoman

THE SCIENCE of PROTECTION

ANTI GRAFFITI

Protection for **Porous** Materials.

Nanoman Anti Graffiti is an advanced, long lasting one coat, non sacrificial, anti-graffiti coating specially formulated to protect surfaces from the permanent defacing of undesirable graffiti. The anti-graffiti coating makes graffiti removal simple and quick without damaging the surface painted or otherwise. Unlike other anti-graffiti coatings that erode away after a few cleanings, Nanoman Anti Graffiti allows graffiti to be removed multiple times without reapplication. Spray, brush or roll it directly onto bare brick and concrete, or previously painted surfaces (including murals). It applies and dries quickly, with excellent adhesion properties. Nanoman Anti Graffiti is eco-friendly, eliminating the need for any harsh environmentally damaging chemical graffiti removers or the use of high pressure cleaners. In addition, coated surfaces become hydrophobic and self-cleaning to normal environmental contaminants increasing the life of the coated item.

APPLICATIONS

- Ideal protection for all porous surfaces including concrete, masonry, brickwork, terracotta, wood, painted surfaces and furniture.

FEATURES and BENEFITS

- Reduction in time and cost to remove graffiti.
- Graffiti can be removed easily, leaving no residue.
- Non sacrificial - sustains multiple graffiti removals.
- Single coat application that's long lasting and durable.
- Reduction in the use of consumables and removers.
- No ongoing recoat and unsightly colour patches.
- No sophisticated equipment required.
- Low VOC application and 0 VOC removal.

KEY FACTS

- Available in 1L, 4L and 20L sizes.
- Single coat application. Avoid applying excessive amounts of the coating and do not apply multiple coats.
- Durable life of up to 10 years on vertical surfaces depending on the material, use and maintenance of the surface.

WHY NANOMAN

NmTM
Nanoman

THE SCIENCE of PROTECTION

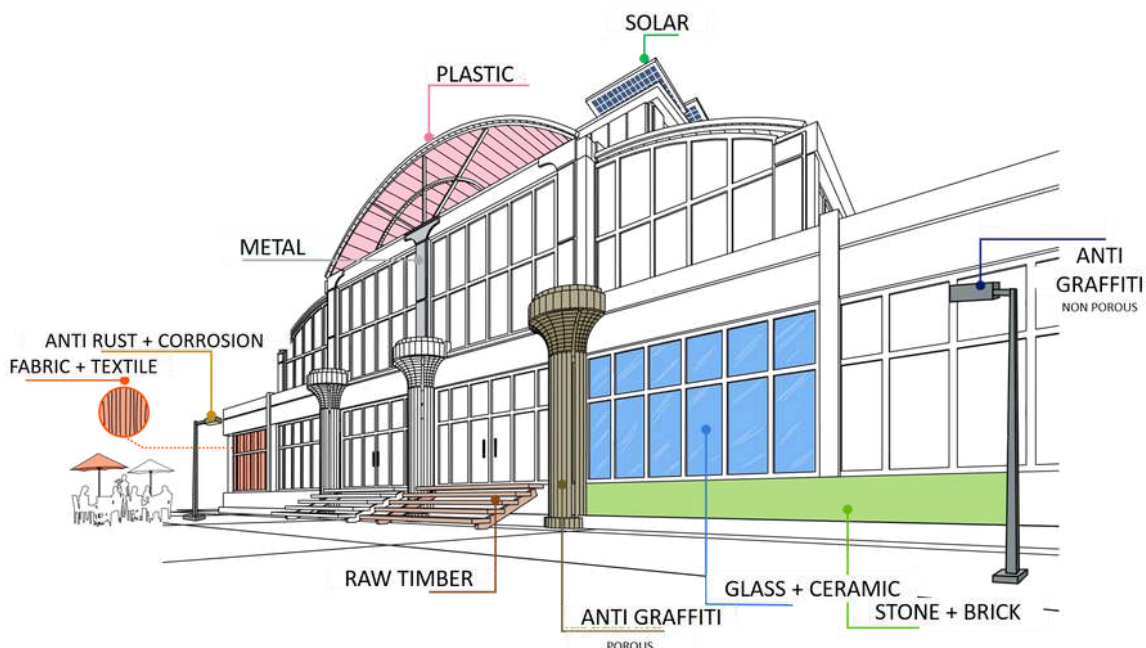

Nanotech Products specialises in the development, manufacture and supply of innovative nano based coatings. Through our Nanoman brand, we offer the most comprehensive range of nanotechnology enabled surface coatings currently available. Nanoman products are all eco-friendly, easy to use and designed to provide maximum protection from liquids, environmental pollution and weathering.

Nanoman Anti-Graffiti has been engineered as a simple and effective way of dealing with graffiti. It allows for rapid removal of all types of graffiti which is considered to be one of the most effective deterrents of further attacks. Nanoman Anti-Graffiti is a clear coating and so ideal for the protection of murals and painted surfaces as well as raw and natural stone or timber materials. It is a single pack, ready to apply coating requiring no primers or second coats that can be applied by spraying, rolling or painting directly onto the surface material. Nanoman Anti-Graffiti coating is the next generation of surface protection.
