

# FABRIC+TEXTILE

## Protective Coating for Fabrics and Textiles.

Nanoman Fabric + Textile is an innovative fibre protection product that will protect all types of textiles against water, dirt and stains, whilst remaining totally invisible. It can be used on suede and leather as well as wool, cotton, synthetics and silk. It will not affect the materials appearance, its ability to breathe, its colour or feel.

### APPLICATIONS

- Clothing and footwear.
- Indoor upholstery such as sofas, chairs, table cloths and bedding.
- Carpets.
- Vehicle and boat seats.
- Waiting rooms, public transport seating.
- Outdoor furniture.
- Canvas umbrellas, marquees, awnings and shades.

### FEATURES and BENEFITS

- Long lasting protection for a wide range fabric and textiles.
- Repels liquids and minimises stains.
- Maintains the look, feel and characteristics of the material.
- Totally invisible.
- UV-stable (i.e. will help prevent discolouration due to sunlight).
- Washing agent resistant.
- Prevents mould, mildew and bacteria from developing.
- Non allergenic and environmentally friendly.
- OEKO-TEX ECO PASSPORT.

### KEY FACTS

- Available in 250ml, 750ml, 1Lt, trade sizes available.
- Typical coverage 80 ml per m<sup>2</sup>.
- Touch dry in 60 minutes, however for best results allow coated material to dry for 24 hours.
