THE SCIENCE of PROTECTION

WHEELS

Protective Coating for Car Wheels & Rims

Nanoman Wheels is a nanotechnology based coating designed to protect your wheels and rims against dirt, road pollution and brake dust. Nanoman Wheels forms a tough, ultra thin, invisible layer on the metal components of the wheel that is both hydrophobic and anti-stick. Water simply beads off the coated surface taking any loose materials with it and cleaning becomes super quick and easy. Brake dust and other damaging contaminants are easily wiped off with a damp cloth eliminating the need for scrubbing and the use of chemical cleaners.

Designed to last for 2+ years, the coating is UV resistant, anti-corrosive and highly abrasion resistant.

FEATURES and BENEFITS

- Keep your wheels and rims looking like new for longer.
- No visual change to the surface.
- Reduces brake dust and dirt particle adhesion.
- Protection against weathering and corrosion.
- Makes the cleaning of alloy and chrome rims significantly quicker and easier.
- Brake dust can be removed easily and does not burn or stain.
- Saves time and money on cleaning agents.
- Dirt can simply be removed with a damp cloth.
- Easy to apply and use 100% UV stable.
- Does not affect rubber components.

KEY FACTS

- Available in 100ml, 250ml and larger trade sizes.
- A single coat will last over two years.
- 100ml bottle will cover at least 8 wheels.

WHY NANOMAN

Nanotech Products specialises in the development, manufacture and supply of innovative nano based coatings. Through our Nanoman brand, we offer the most comprehensive range of nanotechnology enabled surface coatings currently available in Australia and globally.

Nanoman products are all eco-friendly, easy to use and designed to provide maximum protection from liquids, environmental pollution and weathering. Nanoman coatings provide surface protection for a variety of materials including glass, solar panels, stone, concrete, wood, metal, textiles, tile, stucco, block walls, motor vehicles, boats and equipment. Nanoman products reduce the need for the use of cleaning chemicals which are detrimental to the environment making the use of our products a better choice for the planet.
